

Are YOU Protected?

Determining appropriate fire protection for your critical electronic systems (data center, server room, or telecommunications) can be complicated.

- What are my chances of having a fire?
- What does my insurance provider require?
- What would costs be of a fire?
 - Business interruption
 - Lost revenue
 - Lost customer confidence
 - Irreplaceable assets
- Would I face going out of business if I had a fire?
- What is my risk tolerance?

Rapid detection and extinguishment minimize potential loss.

If in answering these questions causes concerns, ESC can assist in looking at alternatives that can eliminate the above.

Risk assessment and solutions are what we do. If you are at all concerned, please call your nearest office.
