creating a fearless environment

Netwatch proactive video monitoring technologies protect property, create safe workplaces and ensure business continuity.

The unique Netwatch system uses the latest, data-driven technologies, proven across thousands of customer sites. Our expert Intervention Specialists direct operations remotely from multiple Netwatch Monitoring Centers worldwide, 24 hours a day, visually verifying intruders and intervening with a live, audio warning – preventing criminal activity from taking place. Customer needs are constantly evolving and our in-house R&D

department, Netwatch Visual Labs, provides the flexibility to introduce new, state-of-the-art solutions that add enterprise-wide value. Our proprietary, software Cratos, provides an additional level of control, allowing subscribers to focus on running the business while we ensure safety and continuity. Combining security and infrastructure management from a single point of contact helps drive better decision making.

Netwatch currently
monitors in excess of
300,000 sites
worldwide

Why Netwatch?

Global Security Leaders

Seamless Customer Service

Future-Proofed Business Security

What will Netwatch do for you?

Netwatch Solutions are trusted and proven to protect businesses worldwide from unforeseen physical threats that impact reputation, continuity or performance. We protect the things that matter most to our subscribers. People, places and assets.

How Netwatch creates enterprise-wide value

- Reduces risk and mitigates liability
- Ensures business continuity and no downtime
- Prevents criminal activity and protects staff
- Adds value as a management tool
- Compliance with Government data and insurance regulations
- Future-proofs business protection

Intruder Alarms

Most basic form of detection: cost effective and reliable

Video Verification

Once the alarm is raised through video analytics, one of our Intervention Specialists will visually verify the alarm.

Proactive Video Monitoring

Detect, verify, intervene, warn and respond

- High-quality footage
- Fast response times
- Real-time detection and intervention
- Live audio warnings
- Preventative response
- No false alarms
- Customized protocols

netwatch visual labs

The Netwatch solution seamlessly monitors and protects businesses from physical and environmental threats through intelligent detection and advanced proactive video monitoring technologies. Our proprietary software **Cratos** is specifically designed to filter out nuisance alarms, providing **industry-leading response times** to security breaches and proactive asset protection.

Netwatch Visual Labs, our in-house R&D department, has developed a powerful software platform which is continually being updated. It manages the flow of live incidents from thousands of sites worldwide and is specifically designed to improve the subscriber experience and internal operations. The software enables the most effective detection and transmission on the market and is made up of 4 main components: Colt, Code, Coms and Core.

CAMS

Filters, prioritizes and presents alarms

CARS

Manages alarms presented to Monitoring Center, eliminating false alarms

cratos

SCOPE

Performs system health checks to ensure systems are fully functioning

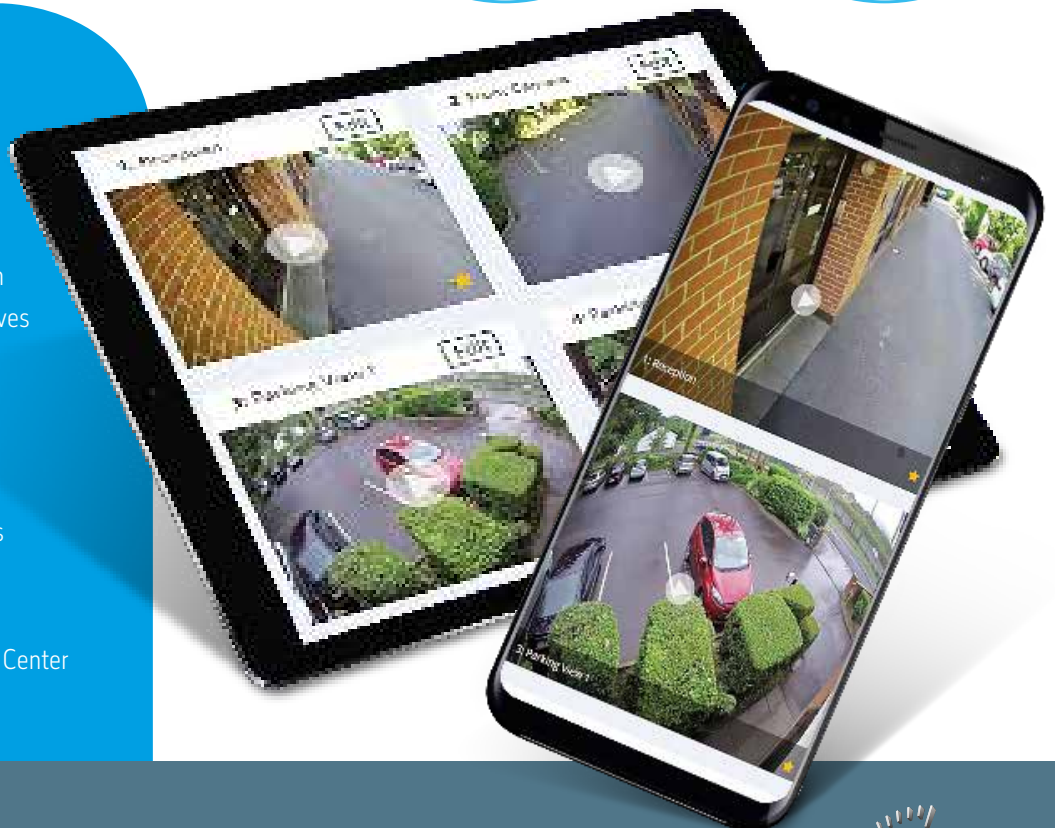

CORE

The user interface with the Netwatch System

Netwatch CORE

Netwatch CORE is a truly unique feature - an interactive platform which gives subscribers full control and visibility of their Netwatch System - through a personalized app that evolves with changing business needs.

- Flexible Zoning
- Visitor Pass
- Online keyholder Protocol Details
- Interactive Site Design
- Arm & Disarm Capability
- Notifications & Requests to NMC Center

Netwatch Monitoring Centers

Our [state-of-the-art](#) Monitoring Centers are designed to operate at the highest international standards. They house the world's most technologically advanced IT infrastructure for remote Proactive Video Monitoring, along with an exceptional, [highly trained, team of Intervention Specialists](#).

- Elite recruitment & training standards for all staff
- Fastest industry response times & full out of hours support
- Multiple World class Monitoring Centers work in unison, to prevent downtime

Intervention Specialists will issue [real time audio](#) warnings in the event of unauthorized entry attempts to your facility, from staff or outsiders.

Our **Cratos** software enables us to integrate seamlessly with all major security equipment technologies.

Our Monitoring Centers manage the out of hours security monitoring of leading Utility and Manufacturing facilities globally.

How it Works

DETECT

①

Cameras with detection software monitor your site for any unusual activity

VERIFY

②

Cratos software interprets the activity and sends an alert to the Monitoring Center

INTERVENE

③

Intervention Specialists are live to the site within seconds and take appropriate action

WARN

④

The Monitoring Center issues a real time audio warning alerting keyholders and authorities

RESPOND

⑤

The site stays live until it is secure. The subscriber then receives a full incident report

Our Industries

Protecting businesses across multiple industries

Our skilled Intervention Specialists will intervene within seconds of suspicious activity being detected on your site.

Car Dealerships

Car dealerships are the perfect environment for a Proactive Video Monitoring system, both because of the value of the inventory on site and its susceptibility to theft.

Construction

Construction sites, plant hire and building sites face a number of security challenges. Thieves tend to see construction sites as 'easy marks,' when compared with more conventional robbery targets.

Canna

Ensuring compliance to the stringent security regulations is vital for the Canna Industry. The Netwatch System is widely used within the industry, helping gain and retain their permits and licenses.

Manufacturing

Safeguarding manufacturing facilities poses various challenges in a number of key areas. You need to safeguard your delivery processes and ensure your staff are secure.

Logistics

Warehousing and Logistics crime causes large scale loss and disruption every year. With valuable assets such as fuel and cargo, it poses the perfect opportunity for theft.

Waste Management

Waste management facilities require tight security in order to keep operations moving on a daily basis. From trespassing to fires, there are numerous threats.
